

CE Credit: 5 Hours

Dentsply Sirona Day of Learning

Implants & Digital Dentures

Morning Session:

Evolution and Advancements in Implant Dentistry

Dr. Montana will review the latest technical and procedural advancements in implant dentistry. The presentation will cover the following topics: 1) the loss of contact that often occurs between implant restorations and natural teeth; 2) patient-specific abutments and the simplicity and reliability they bring to the restorative process, while allowing for functional and esthetic results for each individual patient. Specifically, advancements in screw-retained restorations that provide enhanced efficiency to your existing workflow will be discussed. 3) the latest information and tools necessary to succeed in integrating innovative edentulous treatment procedures into their practices.

LEARNING OBJECTIVES:

- The potential consequences of open contacts
- Designing implant crowns and bridges for today and tomorrow
- The advantages and limitations of both cement and screw-retained options
- Dental implant abutment selection and design, including angulated screw access
- A new alternative for the treatment of the edentulous patient; a healthier, more esthetic and maintainable approach

Afternoon Session:

The Three Appointment Digital Denture

Denture fabrication has seen relatively minor advancements until now! With the advent of digital dentures, dentists and laboratories can provide superior, predictable results in just three appointments. Jimmy Stegall will go over the changes that have occurred in removables, including the Dentsply Lucitone® 3D printing process and materials.

LEARNING OBJECTIVES:

- Clinical records: What is needed for success and how to obtain it
- Denture impressions and where we are today
- Learn a simple systematic approach to a three-appointment digital denture
- Understand denture fabrication methods and how current CAD/CAM technologies have improved them
- See how the latest 3D-printed denture materials are stronger than anything ever used
- How to utilize a functional try-in and why it's better
- Review removable clinical tips and tricks for a less stressful experience and result

Dr. Mark Montana

Dr. Mark Montana is a 1987 graduate of the University of Southern California School of Dentistry and completed his Certification in Advanced Prosthodontics at USC in 1989. He has been primarily involved in private practice in Tempe, Arizona; emphasizing fixed, removable and implant prosthodontics. Dr. Montana has been involved in clinical instruction while attending USC and as a preclinical instructor at the Arizona School of Dentistry. He has lectured domestically and internationally on the topics of implant, fixed and removable prosthodontics.

Jimmy Stegall

Jimmy Stegall is a seasoned dental lab operations and management executive with over 40 years of teaching and clinical experience in the US and Canada. After a successful 30+ year career helping build and lead a large dental lab in South Carolina, Jimmy served as a division President of a large dental lab network, and is now a Procedural Solutions Specialist for Dentsply Sirona.
