

How to

Set up Communicate and Add a New Practice or Lab.

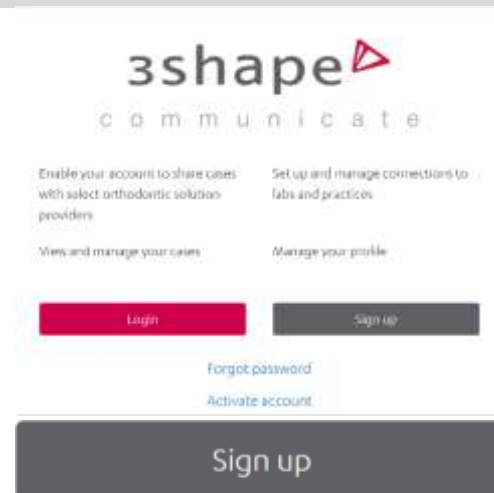

To communicate with your partners, you will need to set up a 3Shape Communicate account and add the labs and clinics to your connections. The 3Shape Communicate account is also required to access the Treatment Review feature. Below you will find instructions on how to set up a 3Shape Communicate account

How to Create 3Shape Communicate Account

Step 1. To set up your new account visit portal.3shapecommunicate.com

Step 2. Select create new account if you do not have an account set up already.

Note: As a lab, if you want to get access to the Treatment Review Portal you need to create a new account dedicated only to managing Argen Clear Aligner cases.

Step 3. Fill in the required fields for the account creation. Provide your first and last name, your email address and create your password. Then press **Next**.

Step 4. Now provide the information about your practice/lab, including its name, address, and phone number.

Step 5. On the last step of the account creation, choose whether you are a practice, lab, or a manufacturer. Then press the **Create account** button.

Step 6. After completing the registration, check your email inbox for an email that contains a link to activate your account.

How to add a lab or a practice

Step 1. Once you're logged into your **3Shape Communicate** account, you can connect to labs and practices. In order to do that, go to the **Connections** tab and press **Add**

Connections

These materials are for training purposes only. For full information on correct usage please consult the official Safety and Set up Guide and the most current Manual. Please contact your reseller for availability of 3Shape products in your country.

Connection. Then enter the email or the name of the lab or the practice you want to connect to and press the search icon.

**Search for D&S under
aligners@dnsdental.com**

Step 2. If you're a dentist, you can also connect with labs within your TRIOS software. To do that open Dental Desktop, go to **More**, then **Connections** and **Labs**.

Step 3. Select **Add** and then search for the lab you wish to connect to by entering the name or email.

**Search for D&S under
aligners@dnsdental.com**

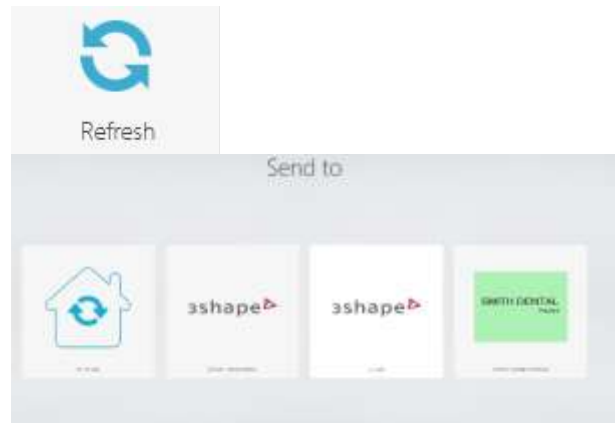

Step 4. The search results will be displayed, and you can request to connect with the practice or lab. You must wait for the lab to accept your request.

The image shows two screenshots of the 3Shape software interface. The top screenshot is the 'Add Connection' dialog, which has a title bar 'Connect to a Practice or Lab' and a search input field labeled 'Enter the email or name of the user you want to connect to'. Below the search field is a list of categories: Patients, Cases, Calendar, and More. The 'More' category is expanded, showing a list of options: General, Material settings, Manufacturing, Import and export, Connections, Practices, Labs, and Manufacturing centers. The 'Connections' option is selected, and the 'Add' button is visible. The bottom screenshot is the 'Add connection' dialog, which has a title bar 'Add connection' and a subtitle 'Please select whether you wish to search a connection on SShape Communicate or add a new connection manually.' Below the subtitle are two buttons: 'Search' and 'Manually'. The 'Search' button is selected, and the 'Connect' dialog is shown. The 'Connect' dialog has a title bar 'Connect' and a subtitle 'Fill in email or name of the one you want to connect to'. Below the subtitle is a search input field labeled 'Enter' and a 'Search' button. The search results show 'Alexander Flutter Dental Lab'. Below the search results is a form to select the type of the 'Alexander Flutter Dental Lab' is, with options: Practice, Lab (selected), and Manufacturing center. The 'Connect' button is visible at the bottom right.

Note: If you refresh the page you will see the practice or lab appear.

Step 10. Now you will be able to see the labs to which you are connected to on the **Send to** page when setting up a case.

How to Enable Treatment Review (for Dentists).

To order Argen Clear Aligners from your lab, you need to enable Treatment Review in your 3Shape Communicate account. To learn how to do so, go through the steps below:

Step 1. First, you will need to connect to your Argen Clear Aligner lab. To do so, login to **3Shape Communicate** and select the **Connections** tab.

Step 2. Now press **Add Connection** and enter the lab's name or email address into the search box. Press **Find**.

Note: Remember to enter the details of the lab's 3Shape Communicate account.

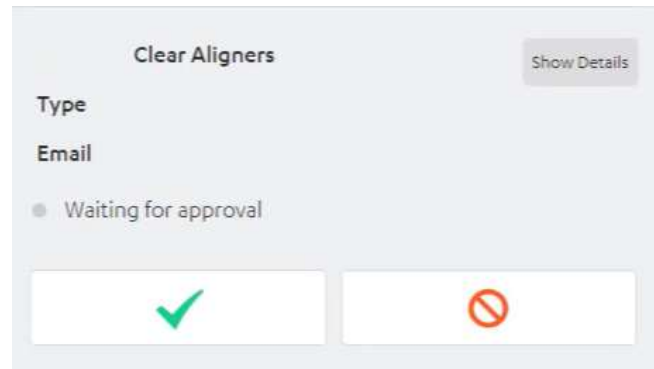

Step 3. Once you have found your lab, press **Connect**. You can customize the message that will be sent with the connection request. After your request is approved by the lab, you will receive a notification email.

The screenshot shows the 'Connections' tab in the 3Shape Communicate interface. It features a red 'Add Connection' button. Below it, there are two identical sections for connecting to a practice or lab. Each section has a search box labeled 'Enter the email or name of the user you want to connect to' with a 'Find' button. The first section shows a search for 'jm.aligners@gmail.com'. The second section shows a search for 'jm.aligners@gmail.com' and a list of results for 'JM Argen Clear Aligners' with the email 'jm.aligners@gmail.com'. A 'Connect' button is visible next to the search results. Below the search results, there is a text area for a message to the lab, with a placeholder text: 'We would like to connect with you on 3Shape Communicate.'

Step 4. If a Clear Aligner lab sent you a connection request, you will also find the request in the **Connections** tab. To accept the request, simply press on the green check button. The status will change from **Waiting for approval** to **Active**.

Step 5. The **Treatment Review Portal** is now available in the menu and you are now able to order Argen Clear Aligners from your lab.

How to

Scan for Clear Aligners with TRIOS.

In order to ensure that your scans will be optimal for designing Clear Aligners, you need to follow some specific rules during the scanning. To learn what those rules are, go through the steps below:

When scanning for Clear Aligners, always scan both jaws, even if the treatment is planned for one jaw only.

Always follow the official 3Shape Scanning Strategy.

For lower jaw the recommended scanning path consists of three swipes:

- Occlusal
- Lingual
- Buccal

For the upper jaw the recommended path is as follows:

- Occlusal
- Buccal
- Palatal

When scanning the upper jaw make sure to include the palatal surface in the scan.

While scanning the occlusion always start at the buccal surface of the molars and make sure to capture both upper and lower teeth. Keep scanning until scans snap into position, however, scan no less than 4 teeth for perfect alignment.

While scanning pay attention especially to:

Interproximal areas – make sure not to leave them open. If, after inspecting the scans you notice any holes, re-scan those areas.

Incisal edges – make sure to capture all of them, while avoiding stitching issues. To ensure a good data coverage, wiggle the scanner while scanning the anterior teeth.

Gingiva – capture a minimum of 2-4 millimeters of gingiva from the margin to ensure a better fit of the aligner.

Molars – always capture all the back teeth even if the treatment does not involve them as the aligner will cover parts of the back molars.

How to Fill in an Order Form in the Treatment Review Portal.

Before you are able to send your case to a Clear Aligner lab, you will need to fill in an order form available in the Treatment Review Portal on 3Shape Communicate. To learn how to do it, go through the steps below:

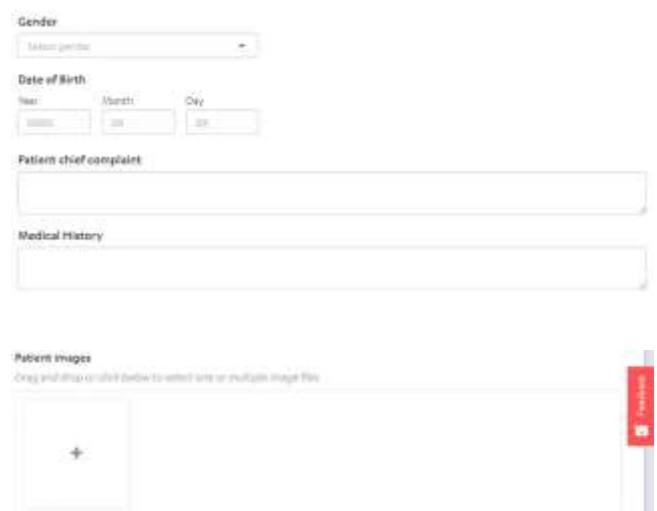

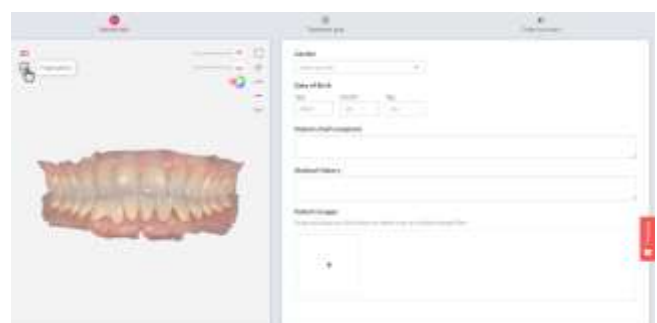

Step 1. Login to your **3Shape Communicate** account and go to the **Treatment Review Portal**. Search for your patient in the **Pending** tab. You can either go through the list of the cases or enter the patient's details in the search box.

Step 2. Press on your patient's name to open the order form.

Note: Here TRIOS users will have access to image gallery with the 3D scans of the patient.

Step 3. Fill in the **Patient info**: select gender from the drop-down menu and enter the date of birth. In the **Patient chief complaint** field, you can specify your patient's wishes. If your patient has a medical history relevant to the treatment, type in that information in the **Medical history** field.

Step 4. To upload any additional case records of your patient, such as intraoral or extraoral photos and x-ray images press on the plus button under **Patient images**. You can also simply drag and drop those records.

Step 5. Once you have filled all the relevant fields, press **Next** to move on to the **Treatment plan** step.

Step 6. On this step you'll need to provide specific details regarding the treatment by choosing the correct options. In case of any doubts, you can hover over the question mark icons to see a short explanation.

Step 7. By default, both arches are selected. If you're planning treatment for one arch only, you can deselect one of the boxes.

Step 8. If the treatment requires addressing crowding or close spacing, you need to select the relevant option under the **Crowding and Spacing** menu.

Step 9. Next, select the type of bite that needs to be corrected from the available list.

Step 10. By default, the midline correction is set to **Maintain**. If you need to move it to the left or to the right, you can do that for both arches separately.

Step 11. Next, you have the option to choose whether you want to correct the anterior posterior relation. You have the option to either:

- **Maintain** the existing one
- **Move toward class I** (Angle classification)
- **Move toward class II** (Angle classification)

Next

Crowding and Spacing ?

☐ Address Crowding

☐ Close Spacing

Crowding: Inadequate space for the teeth in comparison to the jaw size.

Spacing: Excess space for the teeth in comparison to the jaw size.

Choose arch for treatment

☒ Upper Arch

☒ Lower Arch

Crowding and Spacing ?

☐ Address Crowding

☐ Close Spacing

Bite Correction ?

☐ Correct Deep Bite

☐ Correct Open Bite

☐ Correct Overjet

☐ Correct Underbite

☐ Correct Crossbite

Correct Midline ?

☒ Upper: **Maintain**

☐ Lower: **Move Left**

Correct Anterior **Move Right**

Correct Anterior Posterior Relation ?

☒ Left: **Maintain**

☐ Right: **Move Towards Class I**

Treatment **Move Towards Class II**

☐ Allow IPR

You can change those settings for each side independently.

Step 12. Now decide on **Treatment Specifications** for both jaws by specifying whether you want to allow interproximal reduction and placement of attachments. To do it, simply check the corresponding box.

Step 13. To specify preferences for individual teeth separately, press it under **Teeth Restrictions** menu and then select the chosen option. You can choose between:

- **Extract**
- **Missing**
- **Allow Attachments**
- **Allow IPR**
- **Immovable**

You have the option to select more than one tooth at the same time.

Note: If you have allowed IPR and attachment for all teeth, you can now change it for individual teeth by pressing on them and selecting **No IPR** or **No Attachments**.

Step 14. In the last field you can type in any information that might be helpful for the lab and then press **Next**.

Treatment Specifications ?

- ☐ Allow IPR
- ☐ Allow Attachments

Teeth Restrictions ?

Select multiple teeth at once or select a single tooth to add restrictions:

 Extract  Missing  Allow Attachment  Allow IPR  Immovable

Teeth Restrictions ?

Select multiple teeth at once or select a single tooth to add restrictions:

 Extract  Missing  Allow Attachment  Allow IPR  Immovable

How to

Use Treatment Review Portal (for dentists).

To send a case for design, follow the progress of the case, approve the design or request changes, use the Treatment Review Portal. To learn how to navigate it, go through the steps below:

Step 1. Login to your **3Shape Communicate** account and select the **Treatment Review Portal**.

Step 2. Here you'll have an overview of your existing cases, divided into 5 categories. To navigate between those categories, use the menu on the left. You can choose between:

- **Pending**
- **Sent**
- **Designs Pending Review**
- **Approved Treatment Proposals**
- **Completed**
- **All**

Step 3. The **Pending** category includes all the cases that haven't been sent for design yet. The status of the case in this category depends on whether you're a TRIOS user or not. As a TRIOS user you'll see your cases as:

Scanned – those cases include intraoral scans, and after the patient information and order form have been filled in, the case can be sent to the lab.

As a non-TRIOS user, you'll see your cases as:
Created – fill in the patient's information and

the order form to send it to the lab, which will later add scans to the case.

Step 4. Once the case has been sent to the lab, it appears in the **Sent** category. Here your case can go through different statuses as well:

Scan Requested – applicable only to non-TRIOS users. The case has been sent to the lab that currently awaits a scan of the gypsum model or the PVS impression that was shipped to them.

Design Requested – the case is waiting for approval from the lab.

Design Requested Approved – the case has been approved by the lab.

Design Requested Rejected – the case has been rejected. You need to contact your lab for more details.

Step 5. Once the design has been made and sent to you for approval, the case is automatically moved to the **Designs Pending Review** category. Here cases can have one of the two available statuses:

Treatment Designed – the treatment proposal was sent to you for a review.

Treatment Designed Changes Requested – after reviewing the treatment proposal you requested some changes and now are awaiting a new design.

Step 6. Once you review and approve the design, the case appears in the **Approved Treatment Proposals** category. If the treatment proposal has just been approved the case will have **Treatment Designed Approved** status. Once the case is ready for manufacturing the status changes into **Ready for Manufacturing**.

How to Review Treatment Proposal.

All Clear Aligner cases are available for your review before being sent for manufacturing. You can either approve the treatment proposal or request changes. To learn how to do it, go through the steps below:

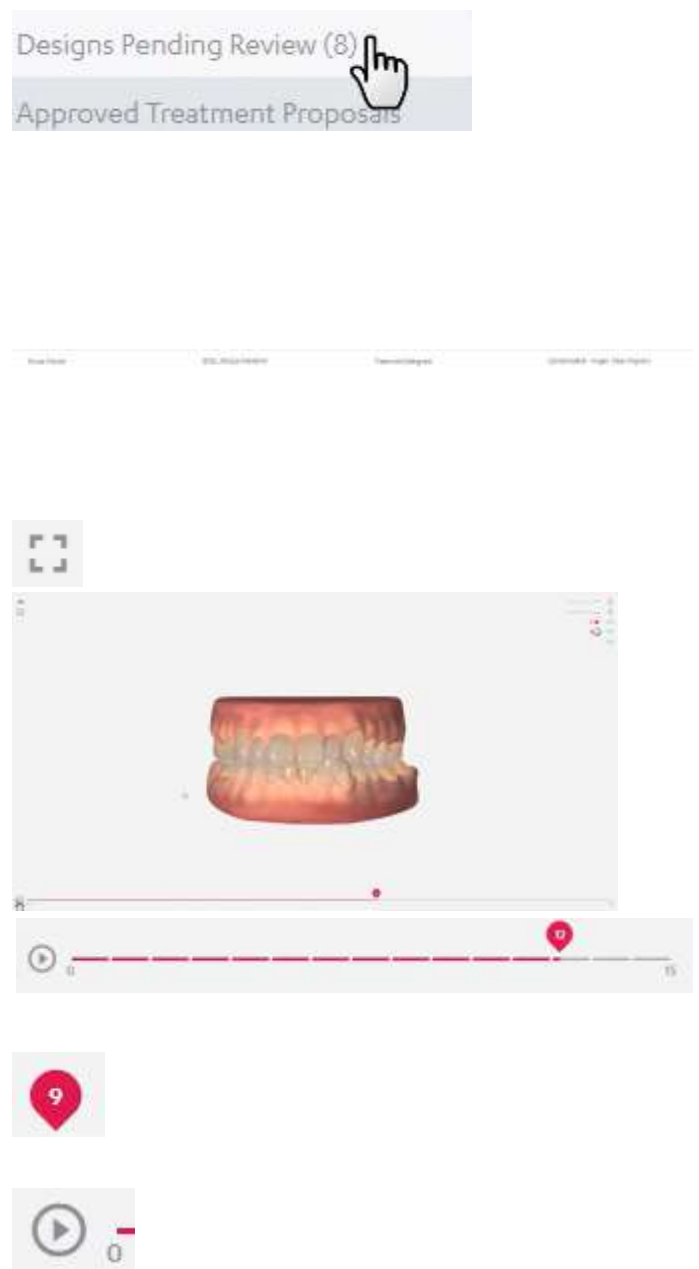

Step 1. All cases with new treatment proposals are available in the **Treatment Review Portal**. To review the proposals, login to your **3Shape Communicate** account, press **Treatment Review** and then **Designs Pending Review**.

Step 2. Select the patient whose treatment proposal you want to review. A new page will open.

Step 3. On the left, you can see the visual representation of the proposed treatment. Press the full screen icon to see the detailed view.

Step 4. Use the timeline to view the stages of the proposed treatment. You can move between the stages to see the visualizations. There are three ways you can navigate between the stages:

- Drag the red bubble icon visible on the timeline. The number displayed in it corresponds with the stage number.

- Press the play icon on the timeline to see the animation of all the stages.
- Press the arrow icons on the top right from the viewer frame, available in the **Treatment Summary** box.

Step 5. You can also turn on and off the model texture. To do this, press the toggle. You can turn the texture back at any time, by simply pressing the toggle again.

Step 6. If attachments are present at any stage, you can change their visibility by using the attachment toggle

Step 7. On the right hand side, you can see the **Treatment Summary**, which is a detailed overview of all tooth movements. By default, it is opened in the **Total Movements** viewing mode, which represents the full proposed treatment per individual tooth.

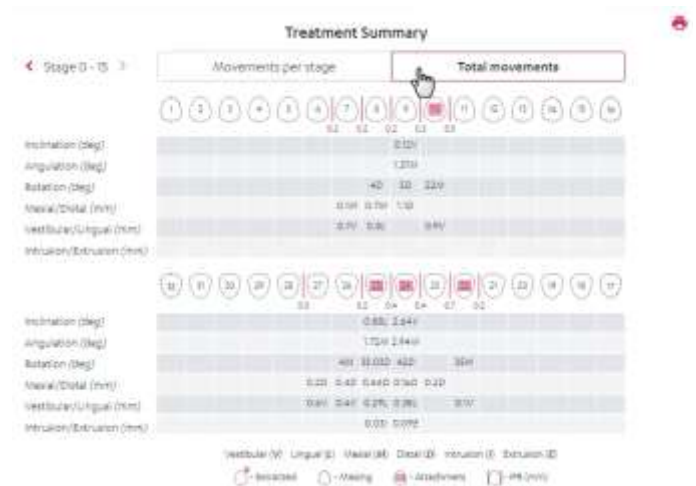

In this mode you can see:

- The total sum of all movements
- The total sum of IPR in millimeters
- Extractions
- Attachments

Step 8. To change the viewing mode to **Movements per stage**, press on the corresponding button. Here you can see the changes in:

- The movement
- The IPR
- Extractions
- Attachments

from the previous to the current stage per individual tooth. Use the navigation arrows to move between stages.

Step 9. To compare your treatment plan with the proposed treatment, press the **Treatment Summary** button and check the information provided there.

Step 10. You can also read and add any comments by pressing the **Comment** button, as well as attach and download relevant for the treatment documents.

Step 11. Once ready, you have the option to approve this treatment proposal or to request changes. To approve it and confirm that it's ready for manufacturing, press the **Approve** button.

Your case will be automatically moved to the **Approved Treatment Proposals** category in the **Treatment Review Portal**.

Step 12. You can also have the treatment proposal modified – to do this, press the **Request changes** button and specify what changes should be made. Once the requested changes have been made by the designer, the new treatment proposal will be available for your review in the **Design Pending Review** category.
